

MOTO-MASK™ “ON” & MOTO-MASK™ “OFF”  
Temporary Transportation Coating  
Product Use Guide

1. What is a Temporary Transportation Coating? (Moto-Mask™ ON)
  - A temporary transportation coating, such as Moto-Mask™ ON, protects delicate paints, parts and highly polished surfaces while in transit as they are exposed to road debris, grit, and abrasive particles. It is easily applied and removed. It is durable enough to last through conditions of rain, mud and grit, yet will not damage, harm, or permanently distort any smooth hard surface that it is applied to.
2. Moto-Mask™ ON is only used on smooth, hard, and polished surfaces such as paint & chrome. It is not to be used on leather, fabric, rubber, or vinyl.
3. Moto-Mask™ ON is not invisible, though you can hardly notice it. It is formulated to allow the bike owner to see that it is present on the surface when you closely inspect the paint. It provides a slight “mottled” or “alligator skin” appearance on the paint. This is an easy reminder that it needs to be removed at the end of the ride.
4. Moto-Mask™ ON can be applied in several coats to build up a tougher “skin” if needed. Simply use like you would any spray on coating.
5. Moto-Mask™ has been laboratory and field tested against light road abrasion typically seen during high-speed touring. It is not meant to protect paint against large flying rocks, pebbles, or larger objects that may impact the surface while at higher speeds.
6. Moto-Mask™ is durable enough to last through rainstorms. The coating may “blush” somewhat as the film absorbs some water, but it quickly dries to return to a tough film.
7. How can I remove the Moto-Mask™ film?
  - Moto-Mask™ “OFF” has been specially formulated for this. It quickly dissolves and breaks up the tough film allowing you to simply wipe away

the residue with a cloth. *For best results use a Bike Brite micro-fiber cloth as these cloths are highly absorbent and will allow you easy removal.* The Moto-Mask™ OFF formulation also polishes and shines much like a wax. For a very high shine, re-apply the OFF by misting the product on the surface. Wipe away to a haze and let dry. Simply buff the dry haze to a brilliant finish.

8. Moto-Mask™ OFF can also be used a quick Detailer to polish all surfaces and apply a glistening shine at any time.
