Bike Brite

The image shows two bottles of Bike Brite Moto-Mask products. On the left is a clear plastic spray bottle with a white trigger, labeled 'Bike Brite MOTO-MASK OFF'. It contains a light blue liquid. On the right is a blue aerosol can with a black cap, labeled 'Bike Brite MOTO-MASK ON'. The can features a motorcycle image and lists benefits such as 'Protects Fairings', 'Protects Front Fork Tubes', and 'Grime Easily Removed'. Both bottles have detailed text on their labels, including a caution and net weight information.

For riders who want to spend more time on their bike and less time cleaning it, Bike Brite's new Moto-Mask On eliminates endless bucket and sponge cleaning sessions. Just spray on and ride. After the ride, simply wipe away bugs and grime with Moto-Mask Off. According to the folks at Bike Brite, it is great for rallies or bikes shows, just slip it into saddlebags.
